Micro:bit Report
Last Revised: February 5, 2023

Table of Contents

Disclaimer

It is your responsibility to read and understand this document on a regular basis because we may update it from time to time.

If you have questions, please contact our micro:bit Team at orcinfo@ieeeottawa.ca

Report Requirements

One of the requirements for participating in a micro:bit challenge is submitting a one page report about your project.

This report should include an introduction of your team, including your team name, team members, and your school if applicable.

It should include a description of your project and its features.

The bulk of this one page report should be taken up by a description of the challenges your team faced while coding and how you overcame them.

Last but not least, you should try to convince us about what makes your project unique, and why your team deserves to win.

The report will account for 30% of your final evaluation.

Submission

This report should be typed and submitted as a .pdf file along with your code and your instruction manual by **11:59:59pm Eastern Time on Saturday May 13th, 2023**. Full submission instructions may be found in the challenge rules. The link to the submission form will become available on the website here: http://www.orc.ieeeottawa.ca/submission/
